

Complaint & Recovery Risk Report

Top SKUs and Carriers by Complaint Frequency & Estimated Recoverable Value

Generated 2026-09-25

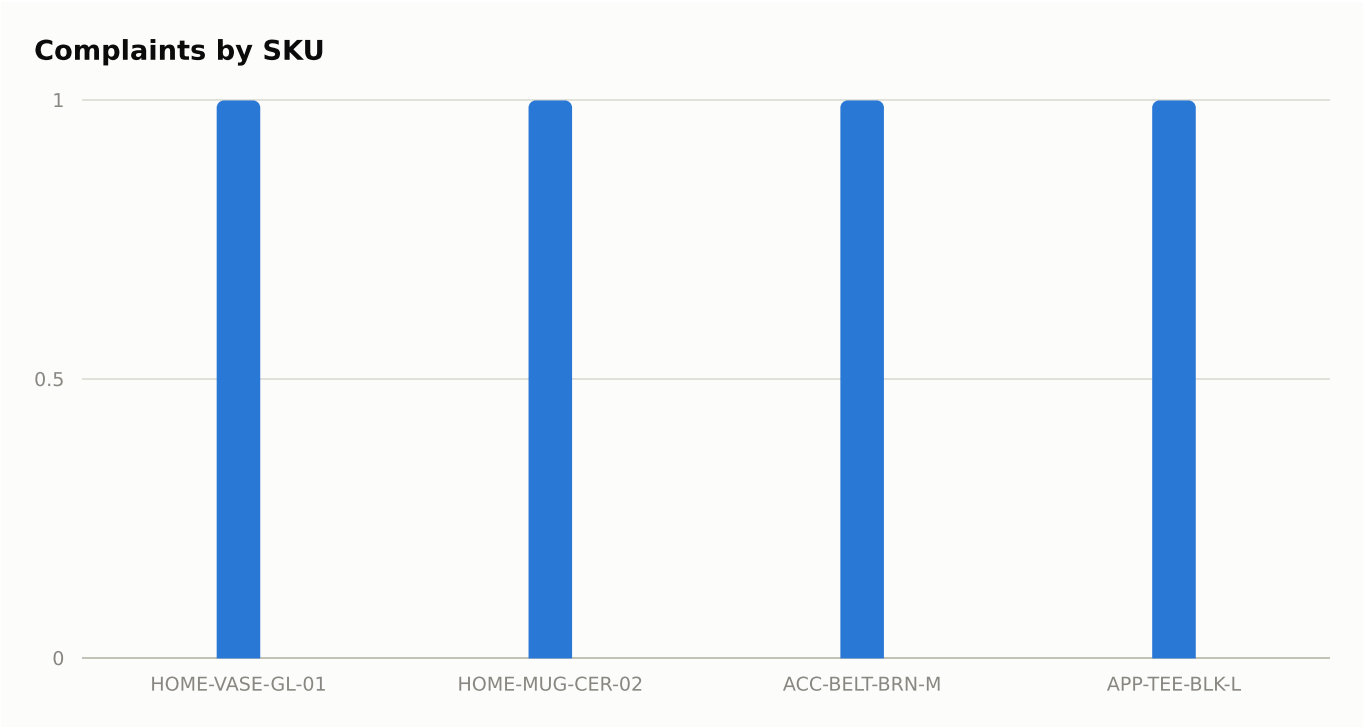

Methodology & Data Scope

This report ranks SKUs and carriers by **complaint frequency** (number of Customer Cases) and **estimated recoverable value** (sum of linked Recovery Draft [estimated_recoverable_value](#)), computed live from the current Claims Resolution & Recovery Hub data plus the recomputed Insight Records.

Important data-scope note: the workspace currently contains only **4 Customer Cases** in total, spanning **4 distinct SKUs** and **3 distinct carriers**. That is fewer than 5 of each, so the "top 5" lists below show **every SKU and carrier currently on record** rather than a padded or fabricated list — there simply isn't a 5th entry yet for either dimension. As case volume grows, these rankings will naturally extend to a full top 5.

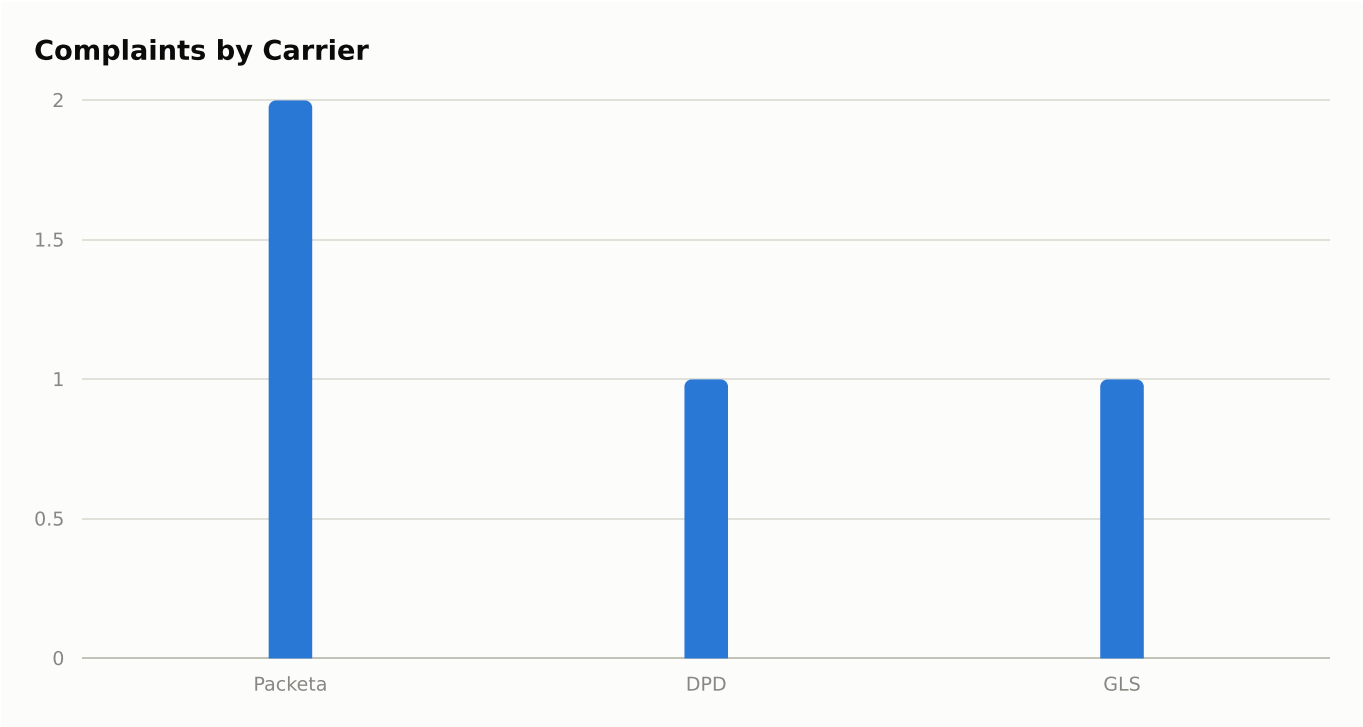

Trend direction is pulled from Insight Records where available; SKU/carrier combinations without a matching Insight Record are marked **"Insufficient data"** rather than guessed.

Top SKUs by Complaint Frequency

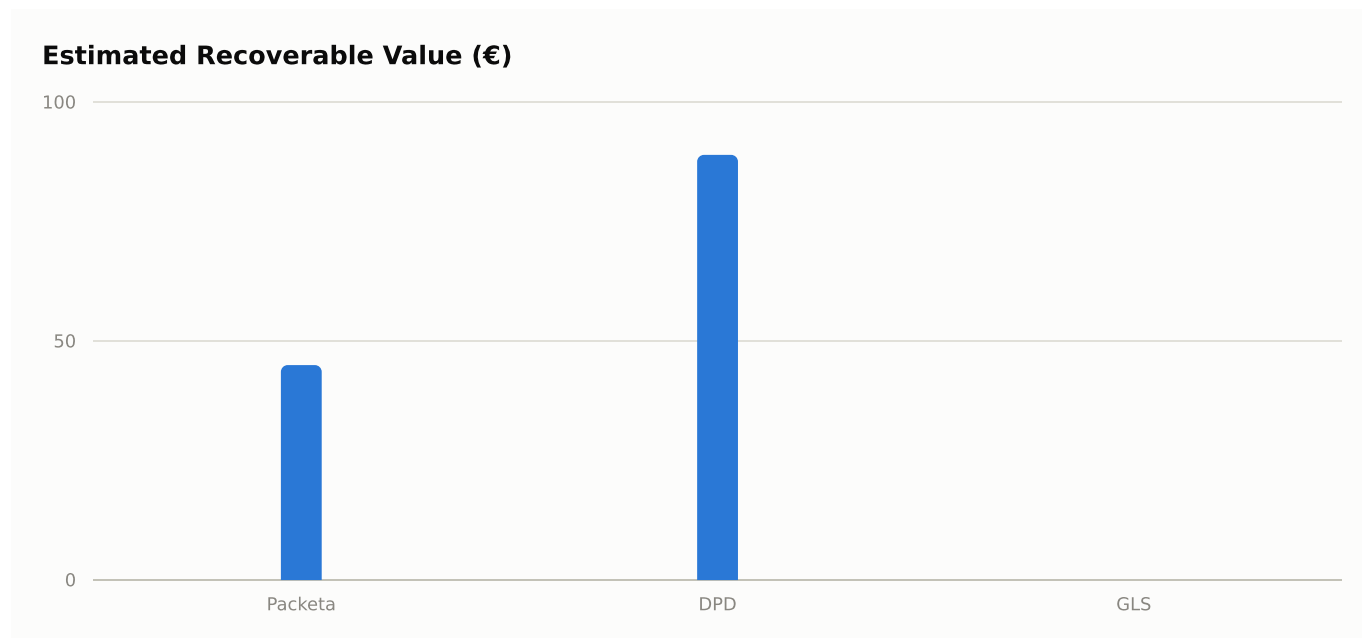

Rank	SKU	Product	Complaints	Recoverable Value	Trend
1	HOME-VASE-GL-01	Venetian Glass Vase	1	€89.00	Insufficient data
2	HOME-MUG-CER-02	Ceramic Mug Set (Set of 4)	1	€45.00	%↑Up
3	ACC-BELT-BRN-M	Leather Belt - Brown, Size M	1	€0.00	%↑Up
4	APP-TEE-BLK-L	Cotton T-Shirt Black L	1	€0.00	Insufficient data

Top Carriers by Complaint Frequency

Rank	Carrier	Complaints	Recoverable Value	Trend
1	Packeta	2	€45.00	%↑ Up
2	DPD	1	€89.00	Insufficient data
3	GLS	1	€0.00	%↑ Up

Recoverable Value by Carrier

Observations

- **Packeta** currently has the highest complaint frequency (2 cases: one damaged delivery, one wrong item), with €45 in estimated recoverable value tied up in an approved-but-unsent Recovery Draft.
- **DPD** has one open, urgent damaged-delivery case (Venetian Glass Vase) with €89 estimated recoverable value; that Recovery Draft is pending approval and is currently blocked from sending because required photographic evidence (damaged item, outer carton, shipping label photos) has not yet been supplied by the customer.
- **GLS** has one return-request case with no associated recovery claim (no carrier or supplier fault implicated), so estimated recoverable value is €0.
- Trend direction is only available for two SKU/carrier pairs (GLS / ACC-BELT-BRN-M, Packeta / HOME-MUG-CER-02), both currently trending **up**; all other pairs lack enough historical Insight Record data to assign a trend and are marked accordingly rather than assumed.
- **Recommendation:** this is a very small sample (4 total cases). Treat this report as a live baseline rather than a statistically robust ranking, and re-run it as case volume grows to get a more reliable top-5 picture.
